## CLOSE RANGE SUBJECT CONTROL

### > Level 1: Mechanical Advantage Subject Control

Controlled F.O.R.C.E. Level 1 teaches personnel how to control a non-compliant subject utilizing body positioning, movement, momentum, and joint manipulation. The system is based on five Mechanical Advantage Control Holds™ (M.A.C.H.) that use a subject's resistance against himself/herself. Each technique of Controlled F.O.R.C.E. can be taught in minutes, saving valuable training time. These tactics greatly reduce the risk of injury to operators and to the subjects they encounter.

**CONTROLLED F.O.R.C.E. Subject Control Training** was developed with the specific needs of the law enforcement officer in mind. Some of the system's hallmarks that thousands of officers have found useful for police work include:

- SIMPLICITY OF USE
- HIGH RETENTION
- FUNCTIONALITY
- ADAPTABILITY
- TEAMWORK
- EFFECTIVENESS

#### THE MECHANICAL ADVANTAGE

Because the system emphasizes Mechanical Advantage over pressure points or pain compliance, the techniques work on any subject regardless of size, strength, skill, psychological state, or level of intoxication or chemical influence.

Controlled F.O.R.C.E. is appropriate and proven to work for:

- Law Enforcement
- Adult Corrections
- Juvenile Justice
- Security
- Protective Services
- Military

#### 1> MECHANICAL ADVANTAGE CONTROL HOLDS™

M.A.C.H. is a series of five techniques that use positioning, movement, body momentum, and resistance to subdue a subject in a controlled manner. These five holds can flow from one to another in any sequence, allowing adjustment to the subject's unpredictable actions. M.A.C.H. holds respond to a subject's resistance, meaning the subject determines the amount of force needed to gain control.

#### 2> M.A.C.H. TAKEDOWNS & HANDCUFF POSITIONING

This category teaches transitions from the M.A.C.H. holds to controlled takedowns into a handcuff position. The category re-emphasizes the importance of body control and momentum while taking a subject down to the prone position. Personnel learn how to observe the subject for signs of physical distress or for a willingness to comply before applying mechanical restraints.

#### 3> M.A.C.H. TEAM ARREST TACTICS

This category teaches verbal and physical communication skills and tactics for use when two or more personnel have exhausted all alternatives and are forced to physically gain control of a resisting subject. Focuses on the relationship between communication and safety in teamwork tactics.

#### 4> M.A.C.H. BATON SUBJECT CONTROL

This category teaches personnel how to use the baton as a TOOL to increase leverage and control while applying the M.A.C.H. techniques. While Controlled F.O.R.C.E. does not teach strikes, this category answers the question of what to do with the baton once it is drawn and striking is unnecessary.

#### 5> M.A.C.H. IN-HOLSTER WEAPON RETENTION

This category teaches personnel how to retain a holstered sidearm from a weapon grab using positioning and body movement. These simple techniques are easy to remember and highly effective, giving personnel life saving options for situations where someone tries to grab their sidearm.
